

Designed by Your Nature

Modular Nature Cabin

33,3 m² / 2 rooms

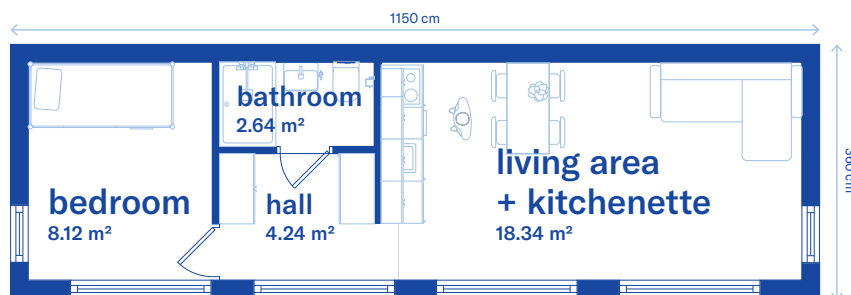

- All-season & customizable design
- Fully furnished & connected in a single day upon arrival
- Self-sustaining zero-energy living

Your Cozy Retreat

Step into our micro home, a cozy retreat designed for those seeking simplicity and tranquility amidst nature. With a minimalistic lifestyle in mind, our compact abode not only meets essential needs but also ensures low running costs, providing an ideal sanctuary for the demands of modern life.

Functional Design

Inside, simplicity meets functionality. The layout features a combined living area and kitchenette, providing essential amenities for everyday living. With the option to configure one or two sleeping quarters, you can tailor the space to suit your needs.

Low Running Costs

This small-sized modular home isn't just a place to live or host guests – it's a sustainable sanctuary where low running costs are a reality. Thanks to cutting-edge construction technology, it's not only an eco-friendly dwelling but also a smart investment in long-term comfort and financial savings.

Environmental parameters

| | | |
|--|--|---|
| | total electric energy consumption of the building | 79.6 kWh/m ² /year |
| | final energy (EK) the amount of energy to be purchased for heating, preparing domestic hot water, and ventilation purposes | 25.3 kWh/m ² /year |
| | usable energy for heating and ventilation (EUco) | 14.8 kWh/m ² /year |

| | | |
|--|--|--|
| | primary energy for ventilation, heating, and domestic hot water (EP) the amount of energy directly obtained from non-renewable natural resources | 0.0 kWh/m ² /year |
| | water balance almost full water consumption savings from the grid with sewage treatment and utilization of rainwater | up to 88 % |
